How do I get vaccinated with Othena?

**Step 1: Register on Othena.com**
- Create an account by visiting Othena.com answering a short questionnaire, and providing your registration details.
  - Current phase eligibility questions
  - Provide your personal details and create login information (email, contact and password)

**Step 2: Wait in a “Digital” Queue**
- Othena confirms you are eligible to have the COVID-19 vaccination.
- Once registered, your details are placed in a queue/line. We will update you when vaccination appointments are available.
  - CDPH & CDC guidelines for distribution are being followed.

**Step 3: Get Your Appointment**
- Vaccine supplies are very limited. Please be patient. As additional doses are received, appointments will be made available.
  - Once you are registered and in the digital queue we will notify you when it’s your turn to schedule an appointment.

- You will receive a second dose of vaccine either 21 days or 28 days after your first dose. Please do not schedule a vaccine appointment if you are not available for both doses.

**Step 4: Be Prepared**
- You can save time at your vaccination appointment by downloading the Othena app and completing the required forms.
  - Fill out required vaccination forms and provide your consent to be vaccinated in the app.
  - Check in with a Quick Response (QR) code you can download from the app.

**Step 5: Get Vaccinated & Schedule Follow-Up**
- Your second dose is scheduled at the appropriate time based on the type of vaccine you received.
  - Second dose appointments are set 21 days after receiving the Pfizer vaccine, and 28 days after receiving the Moderna vaccine.

**Step 6: Stay Engaged & Educated**
- Attend your vaccination appointment and get vaccinated. You will receive a notification with the date, time and location of your second dose appointment.
  - Othena gets you set up for the follow-up appointment.

- Track symptoms from the vaccination in the application.

- After getting your vaccine shot(s), you can use Othena to keep up with the latest vaccine news, engage with the application, and track symptoms.

  - Othena will provide the most up-to-date and factual information as it relates to COVID-19 and the vaccines.
